The new academic year brings a sense of excitement for all of us in the DDI community. Read more to find out about interesting events related to DDI and new developments in the growing area of DDI-compatible software.

Mary Vardigan, Director, DDI Alliance

Second Annual European DDI Users Meeting to Take Place in The Hague

The 2nd Annual European DDI Users Group (EDDI) Meeting is scheduled to take place in The Hague, Netherlands, on December 8 - 9. This second EDDI meeting follows a successful first meeting, which was hosted by the IDSC of IZA in Bonn, Germany, in December 2009.

EDDI 2010 is organized jointly by CentERdata - Institute for Data Collection and Research; DANS - Data Archiving and Networked Services; GESIS - Leibniz Institute for the Social Sciences; IZA - Institute for the Study of Labor; SURF - the collaborative organization for IT innovations in higher education in the Netherlands; and Library and IT Services of Tilburg University.

EDDI 2010 will feature a plenary presentation by Herbert Van de Sompel, Lead of the Digital Library Research and Prototyping Team of the Los Alamos National Laboratory Research Library. Training on DDI 3 will also be offered.

Paper submissions are now being accepted through September 12.

DDI Developers Group to Convene Before EDDI

A meeting for tools developers and implementers will take place just before the EDDI meeting in The Hague on December 6 - 8, Monday, Tuesday, and Wednesday morning. Agenda topics will include interoperability, open source tools, promoting DDI tools, sharing experiences, and future collaboration.

DDI Technical Committee to Meet in Minneapolis

During the week of September 20, members of the DDI Technical Implementation Committee (TIC) will meet in Minneapolis to work on the next versions of the DDI specification in the DDI 2 and DDI 3 development lines.
Workshops and Training Offered

Several opportunities to learn more about DDI and related standards are scheduled in coming months.

- **Eurostat SDMX Technical Workshop** - Prague, September 30 to October 1

- **DDI Expert Workshop** on “Managing Metadata for Longitudinal Data — Best Practices” - Schloss Dagstuhl, Wadern, Germany, October 18 - 22. There has been a lot of interest in this workshop from longitudinal data producers, and there is now a waiting list for the event.

- **DDI Training**, “Using DDI 3 to Support Production, Management, Dissemination, and Preservation Systems for Data in the Social Sciences and Economics” - Schloss Dagstuhl, Wadern, Germany, October 25 - 29. There are still openings in this training event. Interested participants should send email inquiries as soon as possible to secure a seat in the training.

- **SDMX Global Conference**, provisionally scheduled for Washington, DC, May 2 – 4, 2011. Details to be confirmed.

**IASSIST Quarterly to Feature DDI in Special Issue**

The upcoming issue of the IASSIST Quarterly, to be published later in September, will have a special focus on DDI with the following six articles. Thank you to the authors for making this special issue possible.

- **Metadata-Driven Survey Design** - By Jeremy Iverson
- **Questasy: Online Survey Data Dissemination Using DDI 3** - By Marika de Bruijne
- **Implementing DDI 3: The German Microcensus Case Study** - By Andias Wiram-Alam and Oliver Hopt
- **Metadata Creation, Transformation and Discovery for Social Science Data Management: The DAMES Project Infrastructure** - By Jesse M. Blum, Guy C. Warner, Simon B. Jones, Paul S. Lambert, Alison S. F. Dawson, Koon Leai Larry Tan, and Kenneth J. Turner
- **Building a Modular DDI 3 Editor** - By Jannik Jensen and Dan Kristiansen
- **Controlled Vocabularies for DDI 3: Enhancing Machine-Actionability** - By Taina Jääskeläinen, Meinhard Moschner, and Joachim Wackerow
DDI Software in the News

A variety of DDI-enabled software packages are being developed and enhanced. Below we highlight some of these new products and functionalities.

Colectica Announces Colectica Reader and Adds New Examples

Colectica Reader, a free DDI 3 viewer for Windows developed by Algenta Technologies, is now available. The Reader can be used to view and validate DDI 3 files.

Also available on the Colectica site is an example file using the U.S. Supplemental Security Income public-use microdata to show how variables and datasets can be documented using DDI 3 in Colectica.

The DDI 3.1 XML, along with explanatory notes for various parts of the DDI Instance, is provided.

DDI4RDC Showcases Open Source Tools

At the recent IASSIST meeting in Ithaca, NY, DDI4RDC, a consortium of companies comprised of Breckenhill, Algenta Technologies, Metadata Technology and Ideas2Evidence, showcased open source tools that produce metadata products based on the DDI Foundation Tools Program and the DDI Editing Suite Framework, in line with the Open Data Foundation recommendations.

The tools are being developed under contract with the University of Manitoba to be utilized with Canada’s network of Research Data Centres (RDC) by researchers engaged in analytical activities on microdata from population and household surveys. The tools will be made available to the global social science research community.

Supporting bilingual data collection, a specialized edition of Colectica for questionnaire management, and a comprehensive metadata editor, the tools will be released for closed beta later this year. This work, the first phase of a multi-phase initiative, is expected to be completed in 2011.

Nesstar Adds Functionality

Nesstar, a software system for publishing data on the Web with DDI-based metadata, has recently added some new features to its product suite.

The newly launched European Elections Database (EED) employs some of the latest Nesstar technology available. Tables and graphics from Nesstar WebView can now be embedded into Web pages, and EED uses this new feature extensively. Nesstar has also added multilinguality, as shown in the example of the
To facilitate involvement from the statistical community in SuperSTAR development plans, Space Time Research has initiated a SuperSTAR SDMX and DDI Data Exchange group. The SuperSTAR SDMX and DDI Data Exchange Group is a forum for interested parties to review and comment on the SuperSTAR SDMX functional design and use cases, and provide other product development input.

You can read more about this initiative on the project homepage and on the Space Time Research blog.

The DDI Web Site Needs Your Help...

The newly launched DDI Alliance Web site was created by members of the DDI community. We now need your help to maintain and improve it.

A version of SuperSTAR providing large table tabulation and Save-to-SDMX capability from SuperWEB2 is available today. SuperSTAR Release 7.0 including SDMX Web services, DDI 3.1 microdata import support, and other statistical features will be available in mid-2010.
