

# Tools Catalog Group Report 2012/13

*Submitted by Andias Wira-Alam, Chair*

The group is continuing to maintain the catalog, reviewing and publishing new submissions, and keeping contact with the developers. Of the cataloged tools, 30 tools are available under a Freeware License. In terms of DDI Codebook and Lifecycle support, there are 5 tools that support DDI 1.x, 8 tools for DDI 2.0, 15 tools for DDI 2.1, 21 tools for DDI 3.0, and 12 tools for DDI 3.1. In the future, we want to make the DDI Tools Catalogue a useful resource not only for current developers but also for prospective developers who are interested in building tools and submitting them to the Catalogue. We will present the Catalogue as a poster during IASSIST 2013 titled "DDI Tools Catalogue: A Sharing Platform for Everyone."

## **Group Members**

- Andias Wira-Alam, GESIS, Germany (Chair)
- Katherine McNeill, MIT, USA
- Jannik Jensen, Danish Data Archive, Denmark
- Sunny Kaniyathu, University of Saskatchewan, Canada
- David Schiller, Institute for Employment Research, Germany
